SOMETHING SPECIAL I OFFER

- What I offer as unique for websites is the functionality for clients to alter certain aspects of their website whenever they want.
 - For instance, on the Gallery Page to show your product, you can update it daily.
 - Or have a Video post page with the same functionality as an ADMIN user.
 - The HOME page is special; I usually make the functionality so the Client can update the main image as they wish as well as the background for times of the year. For example, at Christmas, have an appropriate background, etc.
 - Sound effects for clicking on buttons or changing pages.
 - Also, moving images, trying to let the user have an experience instead of a static page with information.
-

Arrange a Meeting or Some Coffee:

- To discuss the images and tabs needed for the website.
- Signing of the Data Protection part of the website.
- Initial creation of the website.
- Then we'll do a follow-up within a week, then done.
- Maintenance will incur extra charges, as the user will have functionality to update their site as mentioned.
- Deployment and hosting: if the site is busy, there might be hosting charges, but at the moment it's free.
